Omegatech® Breeze™ Hi-Strength Perforated Hand Pallet Film 460mm x 300m | 6 Rolls

Omegatech® Breeze™ Perforated Pallet Wrap is designed for pallet-wrapping applications where airflow through the load is essential. The perforated structure allows air to move freely through palletised goods while still securely holding the load in place.

- **Unique Hi-Strength Formula.**
- **Ventilated Pallet Film.**
- **Ideal for Food and Beverages.**
- **Pre-Tensioned Film.**
- **Guarranteed Roll Length.**
- **Recycled Content.**
- **Fully Recyclable.**
- **Compatible with all Omegatech® hand pallet film dispensers.**

By enabling continuous airflow, Breeze™ Perforated helps address condensation, ventilation and curing challenges during storage and transport. Fresh air can pass through the pallet while excess heat and moisture are able to escape, reducing the risk of moisture build-up within the load.

This ventilated pallet wrap is particularly suitable for products packed hot, allowing pallets to be wrapped immediately and placed into storage so goods can cool naturally. This helps improve production efficiency by reducing waiting times on packing lines.

Manufactured as a pre-tensioned, hi-strength film, Breeze Wrap provides excellent pallet stability while remaining easy to apply. It is well suited to applications within horticultural, fruit and vegetable, chilled food and canning environments where controlled airflow is required.

It is compatible with all Omegatech® hand dispensers and is also available as a machine film.

TECHNICAL DATA

Material:	The raw material used for manufacting is a linear low density polyethylene (LLDPE) and the production process is five-layer cast co-extrusion
Width:	460mm +/-
Roll Length:	300m +/-
Colour:	Clear
Core:	Flush Cardboard Core
Core Diameter:	50mm +/-
No. of Rolls:	6 Rolls
Product SKU:	OMB-FILM-H
