- Simple integration.
- Plug & play.
- Typically supplied from stock for immediate delivery.

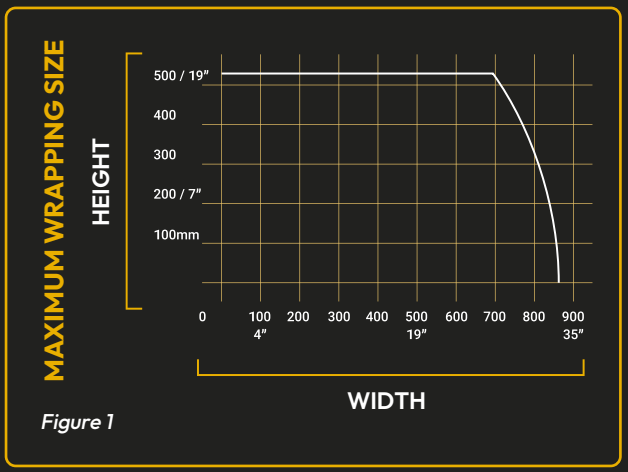

Figure 1

Omegatech® SA900+ Semi Automatic Wrapping Machine

The Omegatech® SA900+ Semi-Automatic Wrapping Machine is designed for reliable wrapping of small to medium sized products up to 890 mm in diameter. The operator attaches the film at the start of the cycle, and the product is passed through the wrapping ring to achieve stable, controlled wrapping with minimal labour and time. Product length is effectively unlimited, with infeed and outfeed conveyor sections to suit.

- **Reduced labour time and cost.**
- **Less waste through an eco-friendly process.**
- **Significant reduction in material usage.**
- **Reduced packaging costs.**
- **Enhanced efficiency.**
- **More effective protection, reducing damages.**
- **Increased customer satisfaction.**

The Omegatech® SA900+ is ideal for products such as kitchen cabinets, wider panel assemblies, door units, window frames and substantial furniture components, making it suitable for both large individual items and bundled sections. The machine can also wrap rolled, circular and irregular shapes, and can be configured to add additional protective materials in-line — such as bubble, paper or foam, for further protection if needed.

As part of the SA+ Series, the Omegatech® SA900+ uses twin-reel heads to apply equal, opposing film forces that keep products centred through the ring, maintaining even tension and accurate lay-on throughout the wrap. Film delivery remains controlled, supporting neat presentation and consistent wrap integrity across varied product types.

With its thick steel-plate construction, the Omegatech® SA900+ is built for long-term stability and durability in industrial environments, providing a reliable investment that saves you time, labour and money.

The SA900+ can be configured to suit your workflow, please speak to our team for details.

Omegatech® SA900+ Semi Automatic Wrapping Machine

Omegatech® SA900+ Semi Automatic Wrapping Machine	
Ring Diameter	920mm
Max Product Width	870mm
Max Product Height	630mm
Film Reel Width	125 / 175mm
Film Reel Inner Diameter	38 - 76mm
Film Reel Outer Diameter	200mm
Power Supply	230 V / 1 Ph / 50-60 Hz
Installed Power	0.75 kW
Rotation Speed	Adjustable - up to 120 RPM
Machine Dimensions LxHxW	1480 x 1250 x 1680mm
Machine Weight	380 kg

What our customers say:

"This was a must have machine to improve the efficiency of our packing facility and reducing the manual handling of the product. It also enables us to package the material better, which in turn should minimise the risk of damage whilst in transit."
